### **DETAILED ACTION**

The finality of the rejection mailed 3/30/09 is withdrawn and the amendment filed 7/30/09 has been entered.

#### ***Allowable Subject Matter***

Claims 9-33 are allowed.

#### ***Claim Rejections - 35 USC § 103***

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Russian '443 publication. This publication discloses the recovery of mercury by breaking lamps, heating the broken parts up to 300 degrees centigrade, and cooling of mercury vapor at 20 degrees centigrade to recover mercury liquid. Applicant's claimed cooling range has a maximum of 'about' 0 degrees centigrade. One skilled in the art would cool the vapor to whatever degree necessary to form the liquid and the difference between 0 degrees centigrade and 20 degrees centigrade is negligible such that the use of 0 degrees centigrade cooling would have been well within the scope of one skilled in the art and of no patentable merit. The remaining limitations would then also have been well within the scope of one skilled in the art and of no patentable merit.

#### ***Response to Arguments***

Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.
